DAY 13 — DUPLICATE RECORD CHECK

Complete Submission Pack | Data Analytics Track

Objective: Find duplicate records, document findings, and provide a cleaned copy of the dataset.

Dataset note: This report uses a sample retail dataset because the original assigned dataset was not available.

1. Methodology

Checked exact duplicates across all columns; preserved the first occurrence; removed subsequent exact duplicate rows; and separately flagged repeated Order_ID values for review. Conflicting key values are not automatically deleted.

2. Results Summary

Metric	Result
Original row count	23
Exact duplicate rows found	2
Rows in cleaned copy	21
Repeated Order_ID values flagged	1003, 1008, 1012
Manual review item	Order_ID 1012 has differing quantity/sales values; retained pending verification.

3. Duplicate Report

The following rows are flagged because they are exact duplicates or share a repeated Order_ID.

Source_Row	Duplicate_Type	Order_ID	Date	Product	Quantity	Sales
22	Exact full-row duplicate	1003	2026-10-02	Water Bottle	1	12.0
23	Exact full-row duplicate	1008	2026-10-04	Keyboard	1	22.0
4	Repeated Order_ID (review needed)	1003	2026-10-02	Water Bottle	1	12.0
22	Repeated Order_ID (review needed)	1003	2026-10-02	Water Bottle	1	12.0
9	Repeated Order_ID (review needed)	1008	2026-10-04	Keyboard	1	22.0
23	Repeated Order_ID (review needed)	1008	2026-10-04	Keyboard	1	22.0
13	Repeated Order_ID (review needed)	1012	2026-10-06	Phone Stand	2	12.0

Source_Row	Duplicate_Type	Order_ID	Date	Product	Quantity	Sales
24	Repeated Order_ID (review needed)	1012	2026-10-06	Phone Stand	3	18.0

4. Cleaned Dataset

The table below shows the cleaned dataset after removing two exact duplicate rows. A CSV copy is also included separately in the ZIP.

1012	2026-10-06	P010	Phone Stand	3	6.0	18.0	Accessories

5. Audit Note and Conclusion

Two exact duplicate rows were removed while preserving the first occurrence. Order_ID 1012 was retained because its quantity and sales values differ and may require source verification. Duplicate rows can inflate totals and counts; checking duplicates helps improve data quality.
